

Video Quality Assurance KPIs

1. Quality Judgement & Case Ownership

- QA Person is responsible for evaluating how strong a case is and ensuring that good cases receive the right treatment.
- He must identify whether the case, storytelling, visuals, and pacing are doing justice to the story.
- For strong cases flagged by the Research Manager, QA person must ensure the final output maintains impact and quality.
- Quality judgement should improve over time and reflect consistency across capsules.

2. Title, Visual & Packaging Alignment

- QA Person must ensure that titles, thumbnails, and visuals are aligned with the story and audience expectation.
- Titles should be clear, engaging, and suitable for YouTube without being misleading.
- Visual flow, scene relevance, and overall alignment with the narrative must be reviewed carefully before publishing.
- Packaging quality should directly contribute to better CTR and viewer engagement.

3. Trend Awareness, Learning & New Ideas

- QA person is expected to continuously learn and stay updated with YouTube trends and content formats.
- QA person should proactively bring **new ideas, observations, and improvements** to the table.
- Trend awareness should convert into **practical suggestions** that the team can implement.
- Growth will be measured by the **quality and usefulness of new ideas shared over time**.

4. Capsule Performance Ownership

- QA Person must track how assigned capsules are performing and understand why they are working or not working.
- He should identify performance patterns and suggest improvements for underperforming capsules.
- Strong-performing capsules and formats should be protected and scaled from a quality and packaging perspective.

5. Team Development & Proactiveness

- QA person is responsible for **upskilling his team** and encouraging proactive ownership.
- QA person should guide the team on quality judgement, packaging, and performance thinking.
- The team should start identifying issues, trends, and improvements **without waiting for instructions**.
- A visible improvement in the team's confidence, output quality, and independence is expected.

6. Feedback Quality & Communication

- Feedback given by QA Person should be clear, specific, and actionable and always in writing.
- The QA team should be able to understand exactly what needs to be fixed and why.
- Quality risks or concerns should be communicated to capsule managers in a timely manner to avoid last-minute issues.
- Repeated mistakes should be reduced over time due to effective feedback.
- QA person should provide monthly ranking of the cases to the respective capsules along with the reasoning.

7. ClickUp Usage & Process Discipline

- All reviews, feedback, and communication must be done on ClickUp keeping higher management involved.
- Tasks and comments for the delay or for any heads up should be updated on time and properly documented.
- Process discipline is expected without the need for repeated follow-ups.

8. Ownership & Professional Conduct

- QA Person is expected to take ownership of outcomes, not just give reviews.
- He should stand by his quality judgement and take responsibility for decisions made.
- Professional conduct, reliability, and accountability are expected at all times. You should have data for each and every scenario.
