

KPIs of QA Manager

1. Overall Quality Ownership Across Channels

- Owns end-to-end quality of scripts, videos, and GC output across all assigned channels.
- Ensures that channel-wise quality benchmarks are defined, understood, and consistently met.
- Maintains uniform quality judgement standards across QA Script, QA Video, and GC teams.
- Any recurring quality drop on a channel reflects directly on QA Manager ownership.

Success Indicator:

- Stable or improving channel performance with reduced quality escalations.
-

2. Accuracy & Consistency of Ratings and Judgements

- Ensures that all cases, scripts, videos, and GC checks are rated without exception on clickup.
- Validates that ratings given by all three teams are:
 - Justified with logic
 - Consistent across capsules
 - Aligned with final output quality and performance
- Regularly audits ratings to identify bias, mismatch, or inconsistency.
- Ensures **monthly case rankings are shared with clear reasoning.**

Success Indicator:

- Minimal disputes on ratings and strong correlation between QA ratings and real performance.
-

3. Case, Capsule & Performance Intelligence

- Consolidates inputs from Script QA, Video QA, and GC to provide:
 - Capsule health status
 - Strong vs weak case identification
 - Recurring quality or compliance patterns
- Ensures **monthly quality scores are shared with clear reasoning.**
- Drives decisions on:
 - Which formats/capsules should be protected

- Which need correction or intervention

Success Indicator:

- Clear visibility of what is working, why it is working, and what needs fixing.
-

4. Forecasting & Content Planning Ownership

- Creates and maintains a forecasting sheet for:
 - Videos to be uploaded
 - Channel-wise planning
 - Capacity vs delivery feasibility
- Proactively flags risks related to delays or quality compromises.

Success Indicator:

- Predictable uploads with fewer last-minute quality or delivery issues.
-

5. Team Leadership, Alignment & Motivation

- Manages three teams as one quality ecosystem, not silos.
- Ensures:
 - Clear role clarity between QA Script, QA Video, and GC
 - Alignment on expectations and standards
- Provides corrective and motivational feedback where required to your team.
- Builds accountability while maintaining team morale.
- Ensures timely feedback to your team

Success Indicator:

- Teams show ownership, confidence, and reduced dependency on escalations.
-

6. Feedback Governance & Closure

- Ensures feedback across all capsules that your team provides is:
 - Clear
 - Actionable
 - Logged on ClickUp
- Verifies that:
 - Feedback is actually incorporated

- Repeated mistakes are tracked and reduced
- GC feedback cycles (Round 1 vs Round 2) are strictly followed and validated.

Success Indicator:

- Visible improvement cycles and reduced rework across teams.
-

7. Process Discipline & ClickUp Compliance

- Enforces 100% ClickUp-first communication for:
 - Reviews
 - Scores
 - Feedback
 - Delays or risks
- Ensures:
 - Scores are updated on time
 - Missing scores or comments are immediately corrected
- No dependency on verbal follow-ups.
- Monthly and Weekly Reports are submitted on time
- Core Meeting are attended regularly and meaningful insights are given

Success Indicator:

- Fully traceable quality decisions with zero process gaps.
-

8. Risk Identification & Escalation

- Identifies quality, compliance, or delivery risks early.
- Escalates with:
 - Clear data
 - Impact assessment
 - Suggested solutions
- Prevents last-minute damage control through proactive intervention.

Success Indicator:

- Fewer emergency escalations and smoother publishing cycles.
-

9. Compliance & Standards Assurance (GC Oversight)

- Ensures GC team maintains zero-miss first-round checks.
- Confirms adherence to:
 - Censorship norms
 - Technical quality standards
 - Subtitle, tag, and branding compliance
- Verifies that GC Round 2 strictly validates corrections from Round 1.

Success Indicator:

- Minimal compliance errors post-publish.
-

10. Ownership, Accountability & Professional Conduct

- Takes responsibility for outcomes, not just reviews.
- Stands by decisions backed with data.
- Demonstrates maturity in handling pressure, feedback, and escalations.
- Acts as the final quality gatekeeper for the organization.

Success Indicator:

- High trust from leadership and operational teams.
-

11. Trend Intelligence & Format Optimization

- QA person is expected to continuously learn and stay updated with YouTube trends and content formats.
- Trend awareness should convert into **practical suggestions** that the team can implement.
- Growth will be measured by the **quality and usefulness of new ideas shared over time**.

Provides structured, data-backed feedback to the Research Department on:

- Which cases to prioritize
- Which formats to scale, correct, or discontinue

Ensures trend insights are aligned with pre-production planning and quality benchmarks.
