

Script Quality Assurance KPIs

1. Case Evaluation & Ranking

- QA person is responsible for evaluating every case and assigning a clear **potential rank** (High / Medium / Low).
 - Ranking should be based on story strength, uniqueness, engagement potential, and clarity.
 - Case ranking should remain consistent across capsules and align with final content quality and performance.
-

2. Capsule Quality Ownership

- QA person must assess script quality **at a capsule level** and clearly identify which capsules are performing well and which are not.
 - He should highlight capsule-specific strengths, weaknesses, and improvement areas.
 - Recurring issues within a capsule should be identified early and addressed through guidance.
-

3. Story, Structure & Engagement Judgement

- QA person is responsible for ensuring scripts have strong hooks, clear structure, and engaging flow.
 - He should identify weak openings, pacing issues, and narrative gaps and guide writers on improvements.
 - Scripts should show visible improvement after his feedback.
-

4. Accuracy, Logic & Consistency

- QA person must ensure factual accuracy, clear timelines, and logical consistency in all scripts.
 - Any inconsistencies or gaps must be corrected before approval.
 - Repeat accuracy-related errors should reduce over time.
-

5. Trend Awareness & New Ideas

- QA person is expected to track storytelling and genre-related trends.
 - He should proactively bring **new ideas, formats, or approaches** that can improve script quality and capsule performance.
 - Trends should translate into practical, testable improvements.
-

6. Team & Capsule Upskilling

- QA person is responsible for upskilling his team and contributing to the improvement of capsules.
 - He should share learnings, best practices, and trend insights regularly.
 - Growth will be reflected in better first-draft quality, reduced rework, and improved consistency.
-

7. Feedback, Communication & Alignment

- Feedback must be clear, actionable, and timely.
 - QA person should communicate case rankings, capsule health, and risks clearly to managers and writers.
 - Miscommunication and repeated quality issues should reduce over time.
-

8. Process Discipline (ClickUp)

- All reviews, case rankings, and feedback must be documented on ClickUp.
 - Tasks and updates should be maintained on time.
 - QA person must ensure his team follows the same discipline.
-

9. Ownership, Growth & Professional Conduct

- QA person is expected to take ownership of script quality outcomes.
- He should demonstrate growth in judgement, leadership, and initiative.
- Professional conduct, accountability, and reliability are mandatory.
